

1. Doctor Login

Access the primary dashboard using the following provider credentials:

- **BMDC Number:** A-56789
- **Password:** doctor123

2. Patient URNs (Record Access)

Once logged into the Doctor Dashboard, you will be prompted to enter a **Patient URN (Unique Registration Number)** to unlock specific medical records. You can copy and paste any of the seeded URNs from the table below:

Patient Name	URN (Unique Registration Number)
Abu Zahed Mohammed Sharif	cmovwcaup000dqaa4pskd0yts
Abdullah ibne Tayeb Tamur	cmovwc37u0000qaa4pb8228ez
Mizanul Haque	cmovwc7k20007qaa4h30r9wsb

3. Consent OTP Process (MVP Bypass)

Note for Production: In the fully deployed version, submitting a URN will automatically trigger an SMS OTP to the patient's registered mobile device for authorization.

For the purposes of this MVP, the SMS step has been bypassed. To simulate patient consent and unlock a record, follow these steps:

1. Enter one of the patient URNs provided above.
2. Click "**Request Consent OTP**".
3. When prompted, enter the universal testing OTP: **123456**.
4. The system will instantly unlock the dashboard, granting you secure access to the patient's records for a **2-hour window**.
